For more than 150 years, Saint Agnes Healthcare has been dedicated to the art of healing by providing exceptional care to the greater Baltimore area.

In 1862, The Daughters of Charity began Saint Agnes Hospital, carrying on their centuries-old mission of service. The oldest Catholic hospital in Baltimore, Saint Agnes was originally established to provide nursing care for the poor. The facility moved to its present location in 1876, and was reorganized as a full-service hospital in 1906. Saint Agnes positioned itself as a leader early on – creating the second oldest surgical residency program in the U.S. Saint Agnes continued to lead in medical advancements, creating the first Chest Pain Emergency Department in the world, being the first in Maryland to bring tomotherapy treatment to cancer care, and leading Maryland in weight loss surgery.

Today, Saint Agnes Hospital is a 251-bed, full-service teaching hospital with residency programs in a number of medical and surgical specialties. Saint Agnes completed a $200+ million expansion that emphasizes patient safety in a high quality healthcare environment. The expansion includes a new patient tower, the new 80,000-square-foot Angelos Medical Pavilion which is home to a variety of specialties, including an expanded Cancer Institute, a new parking garage, and the Hackerman-Patz House for families of patients being treated for long-term ailments.

Saint Agnes Medical Group brings together our extensive network of primary care, pediatric and OB/GYN physicians and leading specialists in locations throughout the Baltimore area, including Howard County.

At Seton Imaging, our board-certified, highly trained radiologists will work closely with your referring physician to perform the most appropriate exam, to obtain high-quality digital images every time, and to provide an accurate interpretation promptly.

The 32-acre Gibbons Commons will be a mixed use community unlike any other in Baltimore, where various innovative housing solutions for families will be located alongside recreational facilities, groceries and other retail outlets, urban green space, and medical office and administrative space.

The Saint Agnes Foundation supports the areas of greatest need at the hospital. All gifts help the mission of healing and hope that the physicians, nurses and associates of Saint Agnes are committed to providing.

Saint Agnes is proud to be a part of Ascension (www.ascension.org), a faith-based healthcare organization dedicated to transformation through innovation across the continuum of care. As the largest non-profit health system in the U.S. and the world’s largest Catholic health system, Ascension, along with Saint Agnes, is committed to delivering person-centered care to all with special attention to those who are poor and vulnerable.
We also believe that healthcare is about more than healing the sick; it is also about encouraging the growth and vitality of our community. To this end, Saint Agnes is committed to sharing the talents of our skilled physicians as widely as possible, with a dedication to moving beyond the campus and into the communities we serve. We have demonstrated this commitment with our investment in our campus and Gibbons Commons, as well as our founding involvement in community partnerships which increase access not only to clinical services, but to jobs and opportunities as well.

Community Benefit
Saint Agnes was founded on a mission of service to the community, particularly those who are poor and underserved, and our community outreach programs continue to expand that mission today. Based on evaluations of the most pressing health needs in our region, the hospital has launched a number of community initiatives to fight cardiovascular disease and obesity, and improve access to primary care.

Saint Agnes is focused on achieving clear and measurable improvements in these areas through the expansion of our popular Red Dress Sunday program, launch of the Women’s Heart Center with its 60-Minute Heart Check, ongoing efforts to fight metabolic disease through our Metabolic Institute, and the continued growth and development of our regional primary care network. In Fiscal Year 2015, Saint Agnes provided $28,193,985 in charity care.
